### Amendments To The Claims

The listing of claims presented below will replace all prior versions, and listings, of claims in the application.

#### Listing of claims:

1-31. (canceled).

32. (new) A contents service providing system, the system comprising:

an analyzing unit for analyzing conditions of a usage environment of a user terminal based on package metadata and determining contents matched with the conditions; and

a providing unit for providing the determined contents to the user terminal, wherein the package metadata includes component metadata for describing attributes of the contents, relation metadata for describing temporal/spatial relation of the contents, and targeting condition metadata for describing the conditions,

wherein the package metadata is capable of matching the contents to the user terminal and consuming a variety of contents with the temporal/spatial relation in the user terminal.

33. (new) The system as recited in claim 32, wherein the component metadata include:

image attribute metadata for describing image attributes of an image contents;  
video attribute metadata for describing video attributes of a video contents; and  
audio attribute metadata for describing audio attributes of an audio contents.

Application Serial No. 10/573,536

PATENT  
Docket: CU-4748

34. **(new)** The system as recited in claim 33, wherein the image attributes include a vertical/horizontal size.
35. **(new)** The system as recited in claim 33, wherein the video attributes include a coding format, and a vertical/horizontal size.
36. **(new)** The system as recited in claim 33, wherein the audio attributes include a coding format, and channel information.
37. **(new)** The system as recited in claim 33, wherein the component metadata includes media-related attributes having a file size.
38. **(new)** The system as recited in claim 33, wherein the component metadata includes contents description metadata having a title, descriptive information (synopsis), and keywords of the contents.
39. **(new)** The system as recited in claim 33, wherein the component metadata includes application program attributes metadata having application program classification information of an application program.
40. **(new)** The system as recited in claim 32, wherein the relation metadata include: temporal relation information for describing a temporal sequence of contents

PATENT  
Docket: CU-4748

consumption; and

spatial relation information for describing relative locations of the contents

consumption.

41. **(new)** The system as recited in claim 40, wherein the temporal relation information includes MPEG-7 MDS TemporalRelation CS information.

42. **(new)** The system as recited in claim 40, wherein the spatial relation information includes MPEG-7 MDS BaseRelation CS information.

43. **(new)** The system as recited in claim 40, wherein the spatial relation information includes MPEG-7 MDS SpatialRelation CS information.

44. **(new)** The system as recited in claim 32, wherein the targeting condition metadata include:

user condition information for describing user conditions of the user terminal;

terminal condition information for describing terminal conditions of the user terminal;

network condition information for describing network conditions connected with the user terminal; and

natural environment information for describing natural environment conditions for consuming the contents in the user terminal.

PATENT  
Docket: CU-4748

45. **(new)** The system as recited in claim 44, wherein the user condition information includes user information and visual/auditory difficulty information.

46. **(new)** The system as recited in claim 44, wherein the terminal condition information includes codec information and device attributes information.

47. **(new)** The system as recited in claim 44, wherein the network condition information includes network capability information.

48. **(new)** The system as recited in claim 44, wherein the natural environment information includes location information and time information of the contents consumption.

49. **(new)** The system as recited in claim 32, wherein the package metadata includes reference information including identification information for describing locations of the contents.

50. **(new)** Package metadata on a computer readable medium, the package metadata comprising:

component metadata for describing attributes of contents;

relation metadata for describing the temporal/spatial relation of the contents; and

targeting condition metadata for describing conditions of a usage environment of the user terminal,

Docket: CU-4748

wherein the package metadata is used for analyzing the conditions of a usage environment of a user terminal to determine the contents matched with the conditions,

wherein the package metadata is capable of matching the contents to the user terminal and consuming a variety of contents with the temporal/spatial relation in the user terminal.

51. **(new)** The system as recited in claim 50, wherein the component metadata include:

image attribute metadata for describing image attributes of an image contents;  
video attribute metadata for describing video attributes of a video contents; and  
audio attribute metadata for describing audio attributes of an audio contents.

52. **(new)** The Package metadata as recited in claim 51, wherein the image attributes include a vertical/horizontal size.

53. **(new)** The Package metadata as recited in claim 51, wherein the video attributes include a coding format, and a vertical/horizontal size.

54. **(new)** The Package metadata as recited in claim 51, wherein the audio attributes include a coding format, and channel information.

55. **(new)** The Package metadata as recited in claim 51, wherein the component metadata includes media-related attributes having a file size.

PATENT  
Docket: CU-4748

56. **(new)** The Package metadata as recited in claim 51, wherein the component metadata includes contents description metadata having a title, descriptive information (synopsis), and keywords of the contents.

57. **(new)** The Package metadata as recited in claim 51, wherein the component metadata includes application program attributes metadata having application program classification information of an application program.

58. **(new)** The Package metadata as recited in claim 50, wherein the relation metadata include:

temporal relation information for describing a temporal sequence of contents consumption; and

spatial relation information for describing relative locations of the contents consumption.

59. **(new)** The Package metadata as recited in claim 58, wherein the temporal relation information includes MPEG-7 MDS TemporalRelation CS information.

60. **(new)** The Package metadata as recited in claim 58, wherein the spatial relation information includes MPEG-7 MDS BaseRelation CS information.

61. **(new)** The Package metadata as recited in claim 58, wherein the spatial relation

information includes MPEG-7 MDS SpatialRelation CS information.

62. **(new)** The Package metadata as recited in claim 50, wherein the targeting condition metadata include:

user condition information for describing user conditions of the user terminal;

terminal condition information for describing terminal conditions of the user terminal;

network condition information for describing network conditions connected with the user terminal; and

natural environment information for describing natural environment conditions for consuming the contents in the user terminal.

63. **(new)** The Package metadata as recited in claim 62, wherein the user condition information includes user information and visual/auditory difficulty information.

64. **(new)** The Package metadata as recited in claim 62, wherein the terminal condition information includes codec information and device attributes information.

65. **(new)** The Package metadata as recited in claim 62, wherein the network condition information includes network capability information.

66. **(new)** The Package metadata as recited in claim 62, wherein the natural environment information includes location information and time information of the
